Under the Whyte notation for the classification of steam locomotives, 2-8-0 represents the wheel arrangement of two leading wheels on one axle, usually in a leading truck, eight powered and coupled driving wheels on four axles, and no trailing wheels. In the United States and elsewhere, this wheel arrangement is commonly known as a Consolidation, after the Lehigh and Mahanoy Railroad's Consolidation, the name of the first 2-8-0. The Consolidation represented a notable advance in locomotive ...

### 2-8-0 - Wikipedia

2-8-0 "Consolidation" Locomotives in the USA. The first 2-8-0 was built by Matthias Baldwin in 1866. The locomotive was named "Consolidation" in honor of the recent consolidation of the Beaver Meadow, Penn Haven & White Haven and Lehigh & Mahanoy railroads into the Lehigh Valley. The Consolidation became the principal hauler on most main lines.

### Bachmann - Baldwin 2-8-0 Consolidation and Tender Steam ...

2-8-0 "Consolidation" Locomotives The Consolidation Type was a highly successful steam locomotive design of the latter half of the 19th century that would eventually replace the 4-4-0 American Type. The new Consolidation, a 2-8-0 design, allowed for more tractive effort with two additional driving axles and a larger boiler.

### 2-8-0 "Consolidation" Locomotives: Photos/Specifications

The 2-8-0 was created to haul heavy coal loads over the mountains of Western Pennsylvania. It went on to become a popular heavy freight locomotive across the country and the world.

### Bachmann Europe plc - Baldwin 2-8-0 Consolidation Western ...

The 2-8-0 Consolidation is a locomotive in Railroad Tycoon II. It becomes available in 1877, and is the strongest locomotive available during it's era. It is very useful for both light and heavy freight work, as it has both a high hauling and grade index, while also being cheap enough as well.
