Wash the filters with water or clean them with a vacuum cleaner. (See the manual for details.) For heavy soiling, wash the filters with a neutral detergent diluted with tepid water and let the filters dry in a shady place. Did this solve your problem? If not, please contact your nearest Daikin representative.

Troubleshooting your Daikin aircon should be reasonably straightforward, as it can all be done through the remote that controls it. If your aircon shuts down and starts showing a blinking green light, you will need to do this. To figure out what is wrong with your aircon, you will first need to slide off the cover of your remote.

## How Can You Solve Daikin Aircon Light Blinking? (Updated)

manual. Inadequate piping may cause water damage. • Tighten the flare nut according to the specified torque. A torque wrench should be used. If the flare nut is tightened too much, the flare nut may crack over time and cause refrigerant leakage. • Do not touch the heat exchanger
