Critical Discourse Analysis (CDA) is an approach to discourse analysis that goes beyond the textual analysis of language, to include analysis of what is between the lines. More specifically CDA deals with the analysis of linguistic features in relation to the broader social, cultural, political, ideological contexts in which language is used.

Writing teachers have been focusing on discourse structures in their classrooms since the 1960s when teaching moved from the sentence level to the discourse level with the introduction of a focus on rhetorical functions in the teaching of second language writing. Examples of rhetorical functions include descriptions, narratives, definitions, exemplifications, classifications, compare and contrast, and cause and effect.

There are many different approaches and techniques you can use to conduct discourse analysis, but the steps below outline the basic steps you need to follow. Step 1: Define the research question and select the content of analysis. To do discourse analysis, you begin with a clearly defined research question. Once you have developed your question, select a range of material that is appropriate to answer it.

Premises for bringing discourse analysis into the language classroom According to the dictionary definition, a premise is something that you suppose is true and that you use as a basis for developing an idea or a statement. Every language teacher approaches his/her task with certain premises about what language is and how it is used.
