Specific volume is defined as the quantity of volume occupied by unit mass of substance and is denoted by.

Mathematically, specific volume is equal to inverse of density of that substance and density is denoted by. Density of ammonia, is equal to.

Substitute for in equation (1) to calculate the specific volume of

Background: This text
was used in Spring 2014
for Donald P. Visco's
undergraduate course in
Equilibrium

Thermodynamics taught
within the Chemical
Engineering Department
at The University of
Akron. This course was
taken by mostly STEM
and Honors students.
