Creating Breakthrough Products describes the new forces driving product development that companies must master if they want to lead and innovate. It is a step-by-step guide to the new ideal in product development.

For years, Jonathan Cagan's and Craig M. Vogel's Creating Breakthrough Products has offered an indispensable roadmap for uncovering new opportunities, identifying what customers really value, and building products and services that redefine markets – or create entirely new markets. Now, the authors have thoroughly updated their classic book, adding new chapters on service design and global innovation, plus new insights, best practices, and case studies from both U.S. and global companies. Their new Second Edition compares revolutionary (Apple-style) and evolutionary (Disney-style) approaches to innovation, helping decision-makers choose between them, and make either one work. Cagan and Vogel provide more coverage of Value Opportunity Analysis and ethnography, as well as new case studies ranging from Navistar's latest long-haul truck to P&G's reinvention of Herbal Essence. Throughout, readers will find up-to-date insights into identifying Product Opportunity Gaps that can lead to enormous success; navigating the "Fuzzy Front End" of product development; and leveraging contributions from diverse product teams – while staying relentlessly focused on customers' values and lifestyles, from strategy through execution. Using additional visual maps and illustrations, they've made their best-selling book even more intuitive and accessible to both industry and academic audiences.

A world-renowned innovation guru explains practices that result in breakthrough innovations "Ulwick's outcome-driven programs bring discipline and predictability to the often random process of innovation." -Clayton Christensen For years, companies have accepted the underlying principles that define the customer-driven paradigm--that is, using customer "requirements" to guide growth and innovation. But twenty years into this movement, breakthrough innovations are still rare, and most companies find that 50 to 90 percent of their innovation initiatives flop. The cost of these failures to U.S. companies alone is estimated to be well over $100 billion annually. In a book that challenges everything you have learned about being customer driven, internationally acclaimed innovation leader Anthony Ulwick reveals the secret weapon behind some of the most successful companies of recent years. Known as "outcome-driven" innovation, this revolutionary approach to new product and service creation transforms innovation from a nebulous art into a rigorous science from which randomness and uncertainty are eliminated. Based on more than 200 studies spanning more than seventy companies and twenty-five industries, Ulwick contends that, when it comes to innovation, the traditional methods companies use to communicate with customers are the root cause of chronic waste and missed opportunity. In What Customers Want, Ulwick demonstrates that all popular qualitative research methods yield well-intentioned but unfitting and dreadfully misleading information that serves to derail the innovation process. Rather than accepting customer inputs such as "needs," "benefits," "specifications," and "solutions," Ulwick argues that researchers should silence the literal "voice of the customer" and focus on the "metrics that customers use to measure success when executing the jobs, tasks or activities they are trying to get done." Using these customer desired outcomes as inputs into the innovation process eliminates much of the chaos and variability that typically derails innovation initiatives. With the same profound insight, simplicity, and uncommon sense that propelled The Innovator's Solution to worldwide acclaim, this paradigm-changing book details an eight-step approach that uses outcome-driven thinking to dramatically improve every aspect of the innovation process--from segmenting markets and identifying opportunities to creating, evaluating, and positioning breakthrough concepts. Using case studies from Microsoft, Johnson & Johnson, AIG, Pfizer, and other leading companies, What Customers Want shows companies how to: Obtain unique customer inputs that make predictable innovation possible Recognize opportunities for disruption, new market creation, and core market growth--well before competitors do Identify which ideas, technologies, and acquisitions have the greatest potential for creating customer value Systematically define breakthrough products and services concepts Innovation is fundamental to success and business growth. Offering a proven alternative to failed customer-driven thinking, this landmark book arms you with the tools to unleash innovation, lower costs, and reduce failure rates--and create the products and services customers really want.

Too many new products fail. New products which are hard to differentiate from existing products won't capture the customer's imagination. The failure is due to a poor understanding of customers' needs. Companies need to take a radical approach to identifying customers' real needs, and this book demonstrates innovative ways to achieve this.

Enhance Fundamental Value and Establish Competitive Advantage with Leadership Agility Whether you're leading an organization, a team, or a project, Stand Back and Deliver gives you the agile leadership tools you'll need to achieve breakthrough levels of performance. This book brings together immediately usable frameworks and step-by-step processes that help you focus all your efforts where they matter most: delivering business value and building competitive advantage. You'll first discover how to use the authors' Purpose Alignment Model to make better up-front decisions about where to invest limited resources—and how to filter out activities that don't drive market leadership. Next, you'll learn how to collaborate in new ways that unleash your organization's full talents for innovation. The authors offer the Context Leadership Model for understanding the unique challenges of any project, and they help you tailor your leadership approach to address them. You'll find a full chapter on organizing information to promote more effective, value-driven decision-making. Finally, drawing on decades of experience working with great leaders, the authors focus on a critical issue you'll face over and over again: knowing when to step up and lead, and when

to stand back and let your team produce results. Coverage includes Effectively evaluating, planning, and implementing large system projects Reducing resistance to process improvements Bringing greater agility to the way you manage products, portfolios, and projects Identifying the tasks that don't create enough value to be worth your time Developing the forms of collaboration that are crucial to sustaining innovation Mitigating project risks more effectively—especially those associated with complexity and uncertainty Refocusing all decision-making on delivering value to the organization and the marketplace Making decisions at the right time to leverage the best information without stifling progress

Serial Innovators: How Individuals Create and Deliver Breakthrough Innovations in Mature Firms zeros in on the cutting-edge thinkers who repeatedly create and deliver breakthrough innovations and new products in large, mature organizations. These employees are organizational powerhouses who solve consumer problems and substantially contribute to the financial value to their firms. In this pioneering study, authors Abbie Griffin, Raymond L. Price, and Bruce A. Vojak detail who these serial innovators are and how they develop novel products, ranging from salt-free seasonings to improved electronics in companies such as Alberto Culver, Hewlett-Packard, and Procter & Gamble. Based on interviews with over 50 serial innovators and an even larger pool of their co-workers, managers and human resources teams, the authors reveal key insights about how to better understand, emulate, enable, support, and manage these unique and important individuals for long-term corporate success. Interestingly, the book finds that serial innovators are instrumental both in cases where firms are aware of clear market demands, and in scenarios when companies take risks on new investments, creating a consumer need. For over 25 years, research on innovation has taken the perspective that new product development can be managed like any other (complex) process of the firm. While a highly structured and closely supervised approach is helpful in creating incremental innovations, this book finds that it is not conducive to creating breakthrough innovations. The text argues that the drive to routinize innovation has gone too far; in fact, so far as to limit many mature firms' ability to create breakthrough innovations. In today's economy, with the future of so many large firms on the line, this book is a clarion call to businesses to rethink how to nurture and thrive on their innovative workforce.

Established companies are clamoring for breakthrough innovation, but are often hamstrung by the highly reliable, repeatable processes of their management systems. Based on years of research, Grabbing Lightning shows how twelve companies have tried to develop a capability for sustainable breakthrough innovation and outlines best practices for your organization. The authors show how the management system for innovation is different from the traditional one in that it allows?and even encourages?mistakes and failures in order to promote learning. Grabbing Lightning outlines the three building blocks of breakthrough innovation (BI) and shows what it takes to become an organization that values the BI management system.

Advance praise for Service Innovation: "To the CEOs of all service companies I deal with: READ THIS BOOK!" -- Dave Wascha, senior director, Bing Product Management, Microsoft Corporation "Lance Bettencourt deftly blends his academic and consulting experience to provide an example-rich, readable, practical, and innovative discussion of service innovation." -- Leonard Berry, coauthor of Management Lessons from Mayo Clinic "Provides the robust framework to design services that unlock growth opportunities for every business." -- Lance Reschke, vice president, Ceridian Corporation "The tools and guidance in this book will inspire companies, small and large, to create effective and innovative services that are desperately needed." -- Mary Jo Bitner, Ph.D., W. P. Carey School of Business, Arizona State University, and coauthor of Services Marketing: Integrating Customer Focus Across the Firm "Cracks the code from the fuzzy front end through the complete life cycle of Service Innovation." -- Angelo Rago, division vice president, Global Customer Services, Abbott Medical Optics "Filled with rich examples of how firms can innovate service through helping customers get jobs done." -- Stephen W. Brown, Ph.D., W. P. Carey School of Business, Arizona State University "Any leader intent on providing distinctive value to customers must read Service Innovation." -- Michael Reynolds, staff vice president, Commercial Marketing, WellPoint, Inc. If there's one truism about the service sector, it's that businesses don't succeed by inventing a better mousetrap; they succeed by finding the best, most cost-effective way to get rid of their customers' mice. In industries ranging from heavy machinery to health care to financial services to consumer goods, service innovation is helping businesses find new revenue streams--and enhance existing ones--by satisfying their customer's need to get things done. Few understand this better than Lance Bettencourt, a strategy adviser at Strategyn and a leading educator in management innovation consulting. And in Service Innovation, Bettencourt gives a master's class on the art and science of creating breakthrough service products. True service innovation demands that you shift the focus away from the solution and back to the customer. To achieve this shift in your business--one that takes you from making educated guesses to building a clear model to guide service innovation--Bettencourt instructs on the finer points of how to rethink your approach to the customer's needs: how the customer defines value in a product or service. Bettencourt mines nearly 20 years' experience in teaching and advising clients with service- and product-dominant businesses to demonstrate proven ways you can build, streamline, and focus your company's service product innovation processes. Among the numerous key ideas and practices are: Insight on understanding the different types of clients you serve—and how your products deliver value to them Ways to design specific frameworks for discovering service innovation opportunities for new, improved, and supplementary service products Practical guidance on staying focused on the "fuzzy front end" of service innovation The fundamental elements of a winning service strategy Finding new ways to help people solve problems and get things done is why there are goods and services in the first place. And in Service Innovation, Lance Bettencourt fills a vital need by delivering the essential guide that can put your business on the latest frontier of value creation.
