This book reflects on science education in the first 20 years of the 21st century in order to promote academic dialogue on science education from various standpoints, and highlights emergent new issues, such as education in science education research. It also defines new research agendas that should be “ moved forward ” and inform new trajectories through the rest of the century. Featuring 21 thematically grouped chapters, it includes award-winning papers and other significant

Papers that address the theme of the 2018 International Science Education Conference.

This volume considers a range of ways in which bilingual programs can make a contribution to aspects of human and economic development in the global South. The authors examine the consequences of different policies, programs, and pedagogies for learners and local communities through recent ethnographic research on these topics. The revitalization of minority languages and local cultural practices, management of linguistic and cultural diversity, and promotion of equal opportunities (both social and economic) are all explored in this light.

This edited volume brings together a broad range of international science education studies, focusing on the interplay of teaching and learning science. It recognizes the complexity present in today's education, associated with major science related issues faced by society, such as climate change, diseases and pandemics, global conflicts over energy, food and water. The studies discussed in this volume are focused on presenting different opportunities to teach these convoluted matters in order to find simplicity within the complexity and make it accessible to learners. They bring together the challenges of preparing the students of today to become scientifically informed citizens of tomorrow.
