The number of primary and revision total joint arthroplasty procedures is increasing exponentially with time. It is anticipated that there will be a huge expected demand for revision knee surgery over the next 2 decades. Knee revisions alone are projected to increase by 601% between 2005 and 2030 in the United

[Revision total hip and knee replacement.](#)

Total knee arthroplasty (TKA) and total hip arthroplasty (THA) are recognised and proven interventions for patients with advanced arthritis. Studies to date have demonstrated a steady increase in the requirement for primary and revision procedures. Projected estimates made for the United States show that by 2030 the demand for primary TKA will grow by 673% and for revision TKA by 601% from the level in 2005.

Future Clinical and Economic Impact of Revision Total Hip ...

Revision total hip replacement is a more complex procedure and takes longer to perform than primary total hip replacement. In most cases, the surgery takes several hours. To begin, your doctor will follow the line of the incision made during your primary total hip replacement.

Revision Total Hip Replacement - OrthoInfo - AAOS

Although hip revisions are currently more frequently performed than knee revisions, the demand for knee revisions is expected to surpass the demand for hip revisions after 2007. Overall, total hip and total knee revisions are projected to grow by 137% and 601%, respectively, between 2005 and 2030.

Projections of primary and revision hip and knee ...

Ideally, as devices and surgical techniques improve, the number of revision arthroplasties relative to primary arthroplasties should decrease. To our knowledge, this is the first study to evaluate state-by-state disparities in the ratio of revision to primary knee arthroplasty (unicompartmental and total) and total hip arthroplasty (THA).
