Sport nutrition : an introduction to energy production and ...

Twitter This is an excerpt from Sport Nutrition-2nd Edition by Asker Jeukendrup & Michael Gleeson. Fatigue toward the end of a prolonged sporting event may result as much from dehydration as from fuel substrate depletion. Exercise performance is impaired when an individual is dehydrated by as little as 2% of body weight.

Dehydration and its effects on performance – Human Kinetics

'Periodized nutrition' refers to the strategic combined use of exercise training and nutrition, or nutrition only, with the overall aim to obtain adaptations that support exercise performance. The term nutritional training is sometimes used to describe the same methods and these terms can be used interchangeably.
