number theory
and geometry,
many of which
can be

understood by
readers with a

presentation is
organized around
24 central
problems, many
of which are
accompanied by
other, related
problems. The
authors place
each problem in

discussion is at
the level of

Each problem
section is

presented in two
parts. The first
gives an

discussing the

the solved and

variants of the
problem. The

second part
contains more
details,

including a few
proofs of
related results,
a wider and

deeper survey of
what is known

about the
problem and its
relatives, and a
large collection
of references.

Both parts
contain
exercises, with
solutions. The
book is aimed at
